

Bristol Community College Fall 2007 Distance Learning Course Offerings

Types of Distance Learning Classes offered at BCC

Web courses do not physically meet on campus at any time during the semester so students do not need to come to campus for any "class meetings." All course work is completed 100% online. Web courses do not have days and times next to their course names. You can tell if a class is a web class by the "W" in the section code. Example: ACC 11 22W.

Hybrid courses are a combination of face-to-face instruction and online interaction. Each hybrid course is different regarding how many times during the semester it meets. However, students should make sure they attend the first class meeting. You can tell if a class is a hybrid class by the "H" in the section code. Example: ACC 50 A2H.

Student Option Enrollment courses allow students to take the course as a traditional lecture course, 100% online or as a hybrid course (student creates combination of lecture and Web based instruction in consultation with the instructor). Attendance at the first class meeting is highly encouraged for those students unfamiliar with student option or distance learning. You can tell if a class is a student option class by the "C" in the section code. Example: CIS 17 A2C.

Interactive Television courses allow students to take courses near home or work through state-of-the-art video technology. Each course is offered in both New Bedford (room 161) and Fall River (room A203) and students can attend class at the location that is most convenient for them. Each site is linked by special interactive technology that allows both groups to participate in real-time classroom activity. You can tell if a class is a student option class by the "V" in the section code. Example: ESL 13 B9V.
