This shows a table. The table has two rows and within each row there are two cells. Notice that in the style I have a border around the table and a thin border around the rows.

This is an introduction

Now I am going to m

This is the first cell of the table.	
This is the second row and the left most cell	This is the second row and the right most cell

Someone asked about changing the border color, this is a style you could add to do that.

border-color red;

```

color: navy;
}
p
{
text-align: center;
font-size: 2em;
}
li
{
color: green;
}
table {
border: solid thick;
}
td, th
{
border: solid thin;
}
</style>
</head>
<body>
<p>This is an introduction to HTML.<br /><br />
Now I am going to make a table!</p>
<table>
<tr>
<td>This is the first cell of the table.</td>
<td></td>
</tr>
<tr>
<td>This is the second row and the left most cell</td>
<td>This is the second row and the right most cell</td>
</tr>
</table>
</body>
</html>

```

The next assignment will be to start a portfolio. This is a template of a very basic one. Please note that the <h1> is a header and I centered it and made it even bigger by changing the font size. It puts out the word portfolio. The <h2> headers are a little smaller, but they are still large and bold and have a blank line beneath. Headers write a blank line beneath.

This is a link to the second page of the portfolio.

The screenshot shows a Mozilla Firefox browser window with the title "Portfolio - Mozilla Firefox". The address bar shows the URL "http://www.pgrocer.net/Cis17/HTML/portfoliotablecontents.html". The page content includes three blue links: "Click here to see resume", "Click here to see courses", and "Click here to see evidence of my computing skills".

The source code window shows the following HTML structure:

```
<html>
<head>
<title>Portfolio</title>
<style type = "text/css">
body
{
background-color: beige;
color: navy;
}
h1
{
text-align: center;
font-size: 3em;
}
</style>
</head>
<body>
<h1>Portfolio</h1>
<a href="portfolioresume.html">Click here to see resume</a><br />
<a href="portfoliocourses.html">Click here to see courses</a><br />
<a href="computingskills.html">Click here to see evidence of my computing skills
</body>
</html>
```

This is the second page of the portfolio. It intends to link to other things I want to show. However, in this template the links do not work because I did not create the pages that are named.
