SOFTWARE DEVELOPER

Highlight

Contribute to the rapidly evolving healthcare industry as you become educated on and utilize MEDITECH's programming languages and development techniques

"I find it very rewarding to have a hand in designing and building new applications. My job gives me the freedom to explore new ideas and techniques every day, allowing me to put all of my skills and experience into practice."

Adam Wirkerman
Software Developer

Description

As a member of MEDITECH's Application Development Team, your job will involve:

- Working with our industry leading technology to create dynamic healthcare applications
- Learning our high level programming languages while writing clear, efficient and high quality code
- Becoming proficient with the programming tools necessary to develop our application, user interface, and database design
- Staying abreast of technology advancements and changes within the industry
- Participating in meetings and conference calls where technical solutions are explained to our customers in end-user terminology

Some of the Unique Opportunities You'll Receive:

- Extensive Benefits package including a remarkable 90% company-paid health and dental insurance
- Long term stability and growth with no layoffs
- In-house training and education sessions, including technical, management, and soft skill development
- Advancement potential, as we only promote from within
- A beautiful and open office environment, featuring local art
- Opportunities to learn and work with cutting-edge technologies

Requirements

- Bachelors or Associates Degree, with course work in a computer programming related field (i.e. Computer Science, Mathematics, Engineering)
- 3+ years of professional development experience or academic equivalent
- Exceptional written and verbal communication skills
- Strong analytical and problem solving skills

Week #11
November 12th

days. For advisement sign up on my door. If I get 10 people that committ to come on Friday the 16th, Max and I can put in an entire day of help like we did last Friday. Max is available in the afternoon as well.

On Thursday during the first part of the class, we have a guest speaker from Meditech coming in to talk about career opportunities with an emphasis on jobs in the programming area.

We will continue talking about Visual Basic this week.

Please read the WINS SCP and cisweb information: (note that in my examples I use cisweb.bristol.mass.edu as the host, we are now using cisweb.bristolcc.edu as the host although the old one is still supported). **Here is information about using cisweb and WINS SCP**

Talks more specifically about portfolio

If you want to download WINS SCP at home, you can find it at this address.

WINS SCP

Portfolio information is available at my website under examples/HTML5 examples and under Notes and Handouts. Please read the information. You might also look at information on the web. Hopefully we will have time to look at the last Alice example.

Assignments:

I want you to start creating an online portfolio. For CIS majors you can work on this throughout your time at BCC and develop a portfolio to help you when you are looking for a job. For now we are going to do a basic start. You should make a title page with basic information and a link to a second page that should contain a menu with links to a database that you upload, two JavaScript problems you have written and other work for this or another course.

Second VB Assignment

I am available for help Monday at 10 and also at around 3 (I have a meeting so I may be a little late. I will also be available Tues and Thurs at 1:45 and I will stay late and I will also be there on Friday if I get 10 student emails confirming they are coming for help. Max will also be available for help if you contact him.

Please read chapter #6.

This week we will start to look at Visual Basic - we will be using version 2010. When you look

1:33 PM 11/15/2012

The screenshot shows a Mozilla Firefox browser window with two panes. The left pane displays a portfolio page with the following content:

Name: Jane Doe

E-mail: jdoe@bristol.mass.edu

Major: Computer Information Systems

Option: Programming

Description:

Insert description here.

Professional Goals:

Insert goals here.

[Click here to go to the table of contents](#)

The right pane shows the source code of the page:

```
1 <!DOCTYPE html>
2 <html>
3 <head>
4 <title>Portfolio</title>
5 <style type = "text/css">
6 body
7   {
8     background-color: beige;
9     color: navy;
10  }
11 h1
12  {
13    text-align: center;
14    font-size: 3em;
15  }
16 </style>
17 </head>
18 <body>
19 <h1>Portfolio</h1>
20 <h2>Name: Jane Doe</h2>
21 <h2>E-mail: jdoe@bristol.mass.edu</h2>
22 <h2>Major: Computer Information Systems</h2>
23 <h2>Option: Programming</h2>
24
25 <h2>Description:</h2>
26 <p>Insert description here.</p>
27 <h2>Professional Goals:</h2>
28 <p>Insert goals here.</p>
29 <br /><br />
30 <a href="portfoliotablecontents.html">Click here to go to the table of contents</a>
31 </body>
32 </html>
33
```

Text on the right side of the source code pane:

This is an example of a very basic portfolio. I hope you will do better!

You need to create a portfolio that should contain examples of your work that you could show a potential employer. The portfolio will be started in CIS120.
